Ventilator Circuits

- Meditech is the leading supplier and manufacturer for highly quality Ventilator Circuits, and Ventilator Tube Circuit, which are made of medical Grade Corrugated PVC Ventilator.
- Ventilator Circuit is provided with a recessed standard 22 mm Male/Male & 22 mm Male/Female adapter for flexibility throughout the critical care management.

HME Filters,

- HME filters are passive humidification systems that retain heat and moisture from the patient's exhaled gas via a hygroscopic filter.
- Bacterial Viral Filters help to provide effective protection against various types of particles including bacterias, viruses, and moisture droplets.

Catheter Mounts

- Catheter Mounts are of great use to add 'extra length' to the breathing system when needed.
- Meditech manufactured catheter mount is compatible with all Breathing and Ventilator circuits.
- Catheter Mounts is connected between the patient and the breathing system.
- The catheter mount with double swivel connector and flexible tubing provides mobility and flexibility to the patient end of the circuit.
