Stone Extraction Balloon

www.meditechdevices.com

Medi-tech stone extraction balloons have a distal plastic balloon framed with X-ray markings, a double or triple-lumen plastic tube and three proximal Luer-Lock connectors for access to contrast media, guidewire or 2-way stopcock for inflation.

Features & Benefits

- Single balloon provides three distinct diameters which helps to reduce procedure time by eliminating unnecessary exchanges.
- Triple lumen catheter provides excellent injection flow while accepting 0.035" guidewire.

Ordering Information

- Available In Size : 9 mm, 12 mm, 15mm
  Cutting Length : 200 cm
  Guidewire Compatibility Upto 0.035".
