Target Micro Puncture Set / Meff Percutaneous Access Set

Product Description

- The Micro Puncture Set is designed for safe and precise vascular access using a minimally invasive technique. It offers a smaller initial entry point compared to traditional access needles, reducing trauma and improving patient comfort. Commonly used in interventional radiology, cardiology, and vascular procedures.

Ordering information

Ref. No.	Description
MMP-4	Micro Puncture Introducer Set -4F With Radiopaque Marker
MMP- 5	Micro Puncture Introducer Set -4F With Radiopaque Marker
PDA-6	MEFF PERCUTANEOUS DILATOR ACCESS SET-6F x 20cm with China needle -21G

Features & Benefits

- 21 Gauge Super Shar Needle & Echogenic tip enhances ultrasound visibility Provides smooth entry into small vessels.
- **0.018" Guidewire** nitinol construction Flexible, kink-resistant, and atraumatic Ensures smooth vessel navigation
  4F / 5F Introducer Dilator & Sheath Tapered dilator for gentle vessel dilation offer Smooth transition minimizes vessel trauma
  Minimally Invasive Access
- Smaller entry site compared to 18G puncture Useful for challenging vascular anatomies
  High Precision Components
- Radiopaque markers for exact positioning Smooth surface finishing for easy insertion
